

Your AI coach. Only on your iPhone.

ZonePit is the iPhone app for cyclists who want to understand their training – with an AI coach that runs entirely on the device.

At a glance

App	ZonePit
Platform	iPhone, iOS 27 or later
Category	Health & Fitness (secondary: Sports)
Languages	German, English
Price	Core features free · Pro: €1.99/month, €14.99/year (14-day trial) or €34.99 one-time
Privacy	On-device processing only · no account · no servers · no tracking
Developer	Alexander Wolpert, Berlin, Germany
Availability	App Store – launch in preparation

Privacy as a principle

Health data never leaves the iPhone. Apple Health is read-only. The coach uses Apple Intelligence's on-device language model – there is no external AI service, no user account and no analytics software in the app.

ZonePit is a training tool, not a medical device.

What ZonePit does

Understand your training

Rides from Apple Health with details, personal bests (5 s, 1, 5, 20 min) and FTP suggestions.

Transparent form

TSS, fitness, fatigue and form with a forecast – the formulas are openly documented.

Weekly plan

A plan that fits your time budget and form, with an explanation for every session.

On-device AI coach

Answers questions about your own data using Apple Intelligence. Changes the plan only after you agree.

Nutrition from Apple Health

Reads energy, carbohydrates, protein and water from Apple Health – from any nutrition app that writes there.

One tap to Zwift

Send sessions to Zwift via Intervals.icu or export them as a ZWO file.
